

COACHING PLATFORM

Coach dashboard manual

Version 27 September 2026 · English edition

This manual follows the same chapters as the built-in help (the question mark at the top right of the dashboard). The red boxes and numbered circles in the screenshots match the numbers in the text. The last chapter shows the athlete app on the phone; those screenshots are still in Dutch, the layout is identical in English.

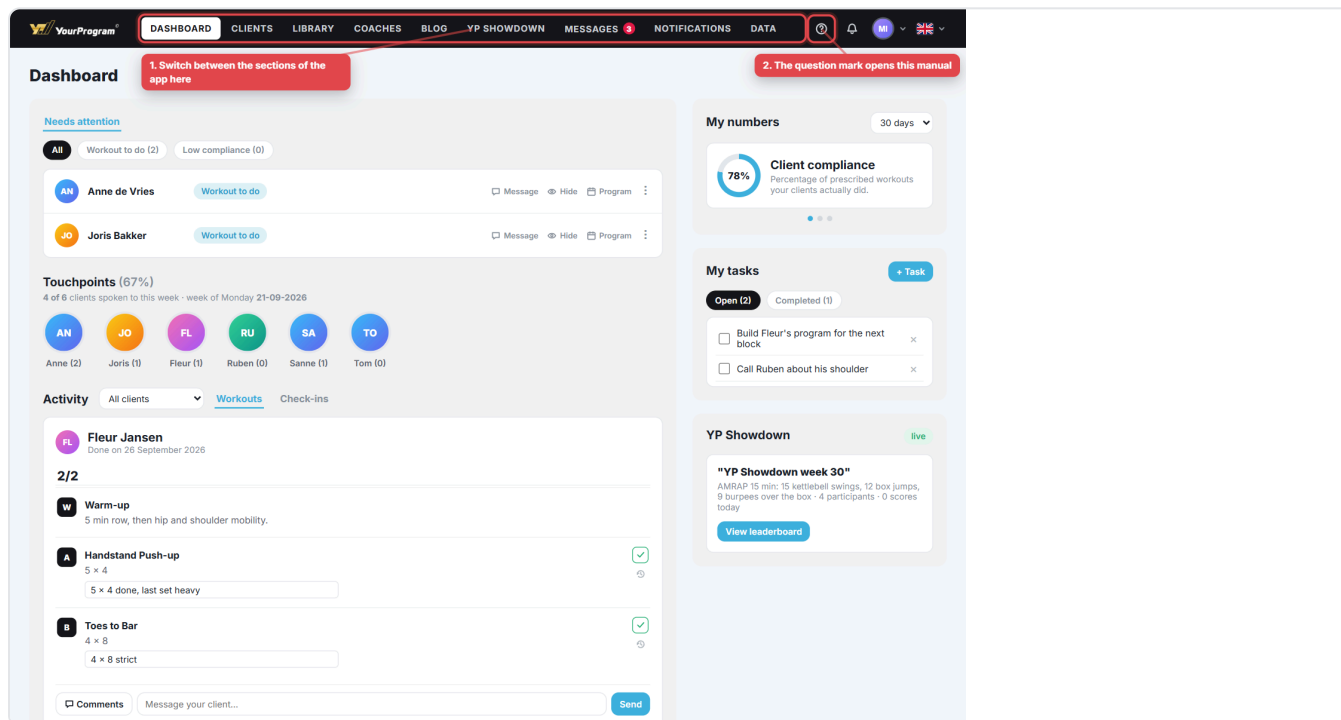

Contents

1. Dashboard
2. Clients
3. Client screen & programming
4. Library & programs
5. Coaches
6. Blog
7. YP Showdown & leaderboard
8. Messages & group chats
9. Data
10. Settings
11. The athlete app

1. Dashboard

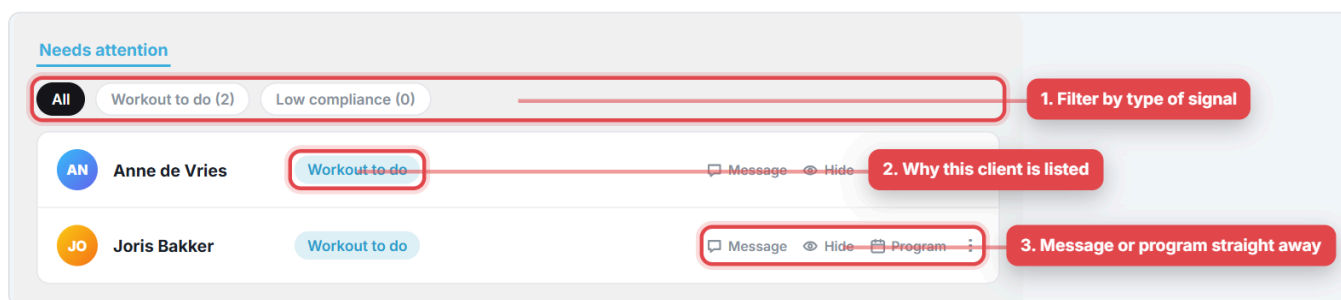

Your home screen. See at a glance which clients need attention, what's been logged in the past few days and what's still on your own to-do list.

1 How the dashboard is structured

The black bar at the top switches between all sections: Clients, Library, Blog, YP Showdown, Messages and Data. To the right of that you'll find the question mark that opens this guide, the bell with your notifications, and your own avatar with Settings and Log out. Below that, the blocks about your clients are on the left, and your own numbers, your tasks and the YP Showdown on the right.

2 Needs attention

These are the clients that need a look: a workout that's ready but not done yet, or low compliance over the last 30 days. Use the buttons at the top to filter on one signal. The blue label tells you why someone is on the list. On the right of the row you can message them straight away or jump to their programming. Click the name to open the client fully.

3 Setting a client aside for a while

The screenshot shows a list of clients: Anne de Vries and Joris Bakker, both with a 'Workout to do' tag. A dropdown menu is open for Anne de Vries, showing options: 'Open client', 'Hide until tomorrow', 'Hide until next week', and 'Hide until next month'. Annotations include: 1. Click the three dots (pointing to the menu icon), 2. Choose how long to set the client aside (pointing to the hide options), and Touchpoints (67%) (4 of 6 clients spoken to this week · week of Monday 21-09-2026).

Already know someone is on holiday? Click the three dots at the end of the row and hide the client until tomorrow, next week or next month. They disappear from this block and come back automatically afterwards. Below the list you'll see how many clients you've hidden, with a link to show them again.

4 Your clients' activity

The screenshot shows the activity feed for Fleur Jansen. It lists three workout blocks: 'Warm-up' (5 min row, then hip and shoulder mobility), 'Handstand Push-up' (5 x 4, 5 x 4 done, last set heavy), and 'Toes to Bar' (4 x 8, 4 x 8 strict). Each block has a progress bar and a status icon (tick or clock). Annotations include: 1. How many blocks are done (pointing to the 2/2 progress bar), 2. The score your client entered (pointing to the '5 x 4 done, last set heavy' text), 3. Tick = completed or missed, clock = history (pointing to the status icons), and 4. Type a message to your client here (pointing to the 'Message your client...' input field).

Every completed workout shows up here as a card: who it was, when, and how many parts are done. Under each part is the score your client entered themselves. If something's not right, use the tick to set it to missed, and the other way round. The clock icon next to it opens the history of that exercise for this client. In the field at the bottom, type a comment that reaches your client as a chat message.

5 Filtering the feed

The screenshot shows the activity feed filter interface. It includes a list of clients: Anne (2), Joris (1), Fleur (1), Ruben (0), Sanne (1), and Tom (0). Below this is a filter section with 'Activity' and a dropdown menu set to 'All clients'. There are also tabs for 'Workouts' and 'Check-ins'. Annotations include: 1. Pick one client or a whole tag (pointing to the client list) and 2. Workouts or check-ins (pointing to the filter tabs).

Use the dropdown next to Activity to look at one client or everyone with a certain tag. Next to it you switch between Workouts and Check-ins. The feed shows six cards; at the bottom there's a button to load six more each time.

6 My numbers and My tasks

The screenshot shows two main sections: 'My numbers' and 'My tasks'. The 'My numbers' section has a dropdown menu set to '30 days' and a 'Client compliance' card showing a 78% completion rate. Below this is a horizontal progress bar with three dots. The 'My tasks' section has a '+ Task' button and two tabs: 'Open (2)' and 'Completed (1)'. Under the 'Open (2)' tab, there are two tasks: 'Build Fleur's program for the next block' and 'Call Ruben about his shoulder', each with a checkbox and a close button.

1. Choose the period

2. Browse the three numbers

3. Add a new task

My numbers 30 days ▾

Client compliance
78%
Percentage of prescribed workouts your clients actually did.

My tasks + Task

Open (2) Completed (1)

- ☐ Build Fleur's program for the next block ×
- ☐ Call Ruben about his shoulder ×

In My numbers you use the dots to browse three cards: your clients' compliance, how many clients you've spoken to this week, and how many need attention. Pick the period yourself with the dropdown. Below that is your own task list. Add one with + Task and tick it off with the checkmark.

7 YP Showdown

The screenshot shows the 'YP Showdown' section. It has a 'live' status indicator. Below this is a card titled '"YP Showdown week 30"' with details: 'AMRAP 15 min: 15 kettlebell swings, 12 box jumps, 9 burpees over the box · 4 participants · 0 scores today'. At the bottom of the card is a 'View leaderboard' button.

1. Live for your members

2. To the leaderboard

YP Showdown live

View leaderboard

The latest YP Showdown that's live, with the number of participants and how many scores came in today. The button takes you to the full leaderboard.

2. Clients

Your client list. This is where you invite new clients, add tags, export your data and archive people who stop.

1 The client list

The screenshot displays a web application for managing a client list. At the top, a summary bar shows four key metrics: 6 Active Clients, 78% Compliance (with a 'Workout: 30 days' dropdown), 33% Consult Rate (over 30 days), and 67% Touchpoints. Below this is a search bar labeled 'Search by name...', a 'Choose tag' dropdown, an 'Add client' button, and 'Manage tags' and 'Export' links. A toggle switch at the bottom left allows switching between 'Active 6' and 'Archive 0' views. The main section is a table with columns for Name, Workout, Compliance, and Tags. The table lists six clients: Anne de Vries, Fleur Jansen, Joris Bakker, Ruben Smit, Sanne Hoek, and Tom Verhoeven, each with their last consultation date, next workout, compliance percentage, and associated tags. Red callout boxes with numbers 1 through 5 provide context for these features.

1. Four numbers across your whole client base

2. Search by name

3. Filter by tag

4. Invite a new client here

5. Active clients or your archive

NAME	WORKOUT	COMPLIANCE	TAGS
AN Anne de Vries Last consultation: 21 September 2026	today	50%	+
FL Fleur Jansen Last consultation: 15 September 2026	none planned	100%	+
JO Joris Bakker Last consultation: n/a	today	50%	Competition × +
RU Ruben Smit Last consultation: n/a	none planned	100%	Injury × +
SA Sanne Hoek Last consultation: n/a	tuesday	100%	New × +
TO Tom Verhoeven Last consultation: n/a	none planned	—	+

1 four numbers across your whole client base: how many active clients you have, the average compliance (with a dropdown for the period), the consultation rate over 30 days and how many clients you've spoken to this week. 2 the search field searches by name. 3 with Choose tag you filter the list on one or more tags. 4 this is where you invite a new client. 5 switch between your active clients and your archive. The table shows each client's next or missed workout, their compliance and their tags; click a row to open them.

2 Inviting a client

The screenshot shows the 'Add client' form with the following fields and annotations:

- First name**: Text input field.
- Last name**: Text input field.
- Email address**: Text input field containing 'name@example.com'. Annotation 1: 'Your client receives the invitation at this address'.
- Coach**: Dropdown menu with 'Michel Bakker' selected. Annotation 2: 'Which coach they are linked to'.
- Becomes a 1-on-1 client with their own program.**: Text input field. Annotation 3: 'This says what kind of client they become'.
- Create invite**: Button. Annotation 4: 'Creates the account and sends the email'.
- Close**: Button.

Background elements include a 'TAGS' section with 'Competition' and 'Injury' tags, and a 'New' tag button.

Click + Add client, fill in the name and email address and choose the coach. Everyone you invite here becomes a 1-on-1 client with their own program; you invite a free blog member under Blog. When you click Create invite, the account is created immediately and your client receives an email with three steps: choose a password, install the app, log in. They appear in your list straight away with the label Invite pending, so you can already start programming for them.

3 Working with tags

The screenshot shows a list of clients with a tag picker overlay. The client list has columns for client name, last consultation, next consultation, and progress. The tag picker shows a list of tags with checkboxes and a 'New tag...' button.

Client	Last consultation	Next consultation	Progress
Joris Bakker	n/a	today	
Ruben Smit	n/a	none planned	100%
Sanne Hoek	n/a	tuesday	100%
Tom Verhoeven	n/a	none planned	-

Tags: Competition, Injury, New, Competition. New tag... button at the bottom.

Tags are labels you create yourself, for example Competition, Injury or Monday. Click the + behind a client and tick a tag on or off. At the bottom of the little window you create a new tag with its own colour; it then appears straight away in the tag picker at the top. You filter with Choose tag next to the search field: every tag you tick appears underneath as a chip, and you remove it again with the little cross. If you choose two tags, only the clients that have both remain, so your filter gets narrower rather than wider. As long as a tag is active, every row gets a circle to tick off while you program. With Manage tags you rename tags, give them a different colour or throw them away.

4 The menu behind a client

The screenshot shows a list of clients with columns for initials, name, last consultation, next consultation, and a percentage. A red box highlights the three dots at the end of each row. A second red box highlights the dropdown menu that appears when the dots are clicked, listing actions: Edit profile, Intake form, Send message, Send password link, Transfer, and Archive. A third red box highlights the 'Profile, intake, message, transfer or archive' text in the menu.

Initials	Name	Last consultation	Next consultation	Percentage	Actions
AN	Anne de Vries	21 September 2026	today	50%	⋮
FL	Fleur Jansen	15 September 2026	none planned	100%	⋮
JO	Joris Bakker	n/a	today	50%	⋮
RU	Ruben Smit	n/a	none planned	100%	⋮
SA	Sanne Hoek	n/a	tuesday	100%	⋮
TO	Tom Verhoeven	n/a	none planned	-	⋮

The three dots after each row open a menu: edit profile, open the intake form, send a message, send a password link, transfer the client to another coach, or archive. Archiving removes the client from all lists and counts, but keeps everything. You can bring them back via the Archive tab.

5 Export to a file

The screenshot shows the 'Export to CSV' dialog box. A red box highlights the 'Choose the columns. 6 clients will be exported.' text. A second red box highlights the '1. Tick the columns you want in the file' instruction. The dialog lists various columns with toggle switches: Select all, Client ID, Email, Coach email, Created on, Address, Weight (kg), Date of birth, Tags, Compliance %, Name, Coach, Status, Phone, Height (cm), Gender, Emergency contact, Workouts done, and Max lifts (1RM). The 'Export' button is highlighted in blue.

Export to CSV
Choose the columns. 6 clients will be exported.

1. Tick the columns you want in the file

- ☒ Select all
- ☐ Client ID
- ☐ Email
- ☐ Coach email
- ☐ Created on
- ☐ Address
- ☐ Weight (kg)
- ☐ Date of birth
- ☐ Tags
- ☐ Compliance %
- ☐ Name
- ☐ Coach
- ☐ Status
- ☐ Phone
- ☐ Height (cm)
- ☐ Gender
- ☐ Emergency contact
- ☐ Workouts done
- ☐ Max lifts (1RM)

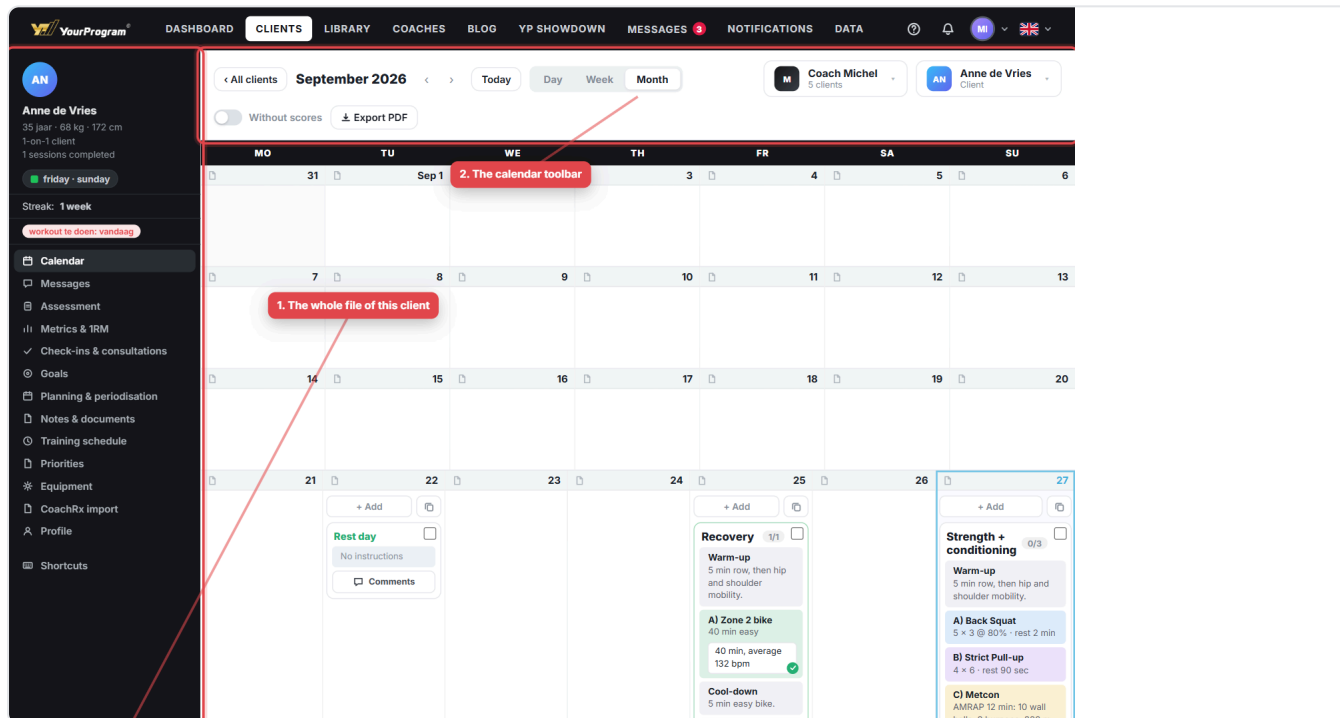

Cancel Export

Export creates a CSV file you can open in Excel or Google Sheets. You tick which columns to include, from name and email to compliance and max lifts. The file contains the clients you can see at that moment, so filter first if you only need some of them.

3. Client screen & programming

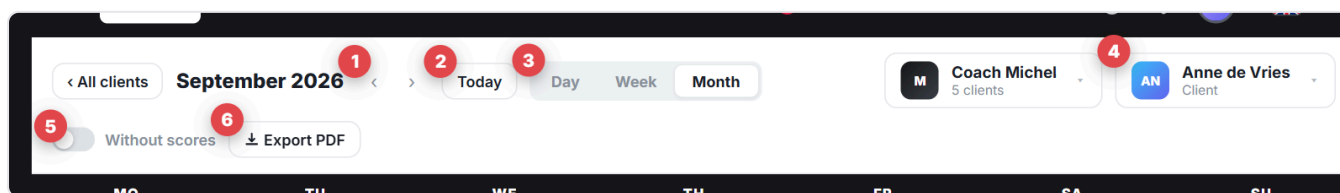

The heart of the app. Here you see one client's calendar, build their workouts and keep their client file up to date.

1 This is what the client screen looks like

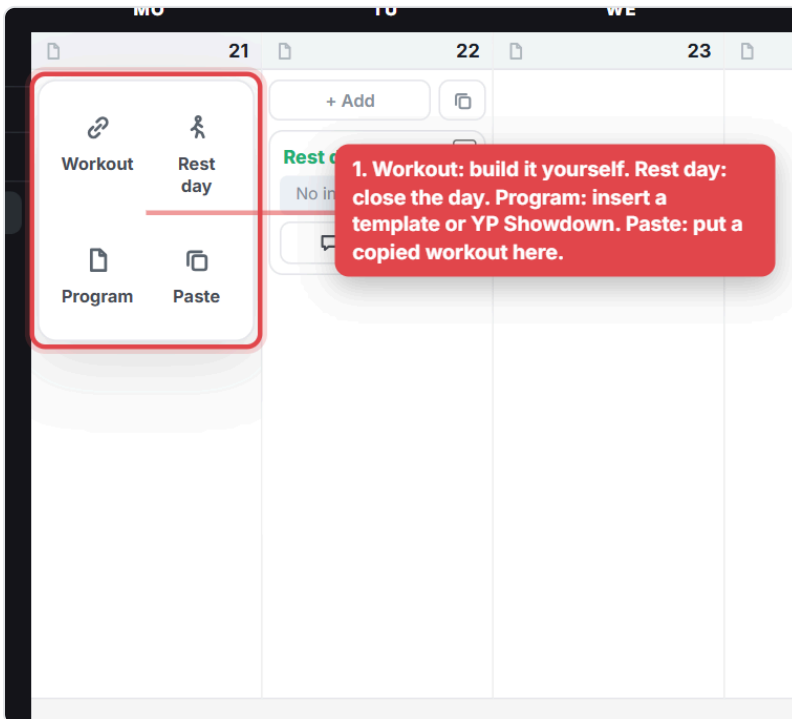

On the left, this client's file: their details at the top, below that the panels (assessment, metrics, notes, goals and the rest). On the right, the calendar that simply runs on, month after month. Use the arrow at the bottom left to collapse the sidebar into a narrow icon column if you want more space.

2 The calendar toolbar

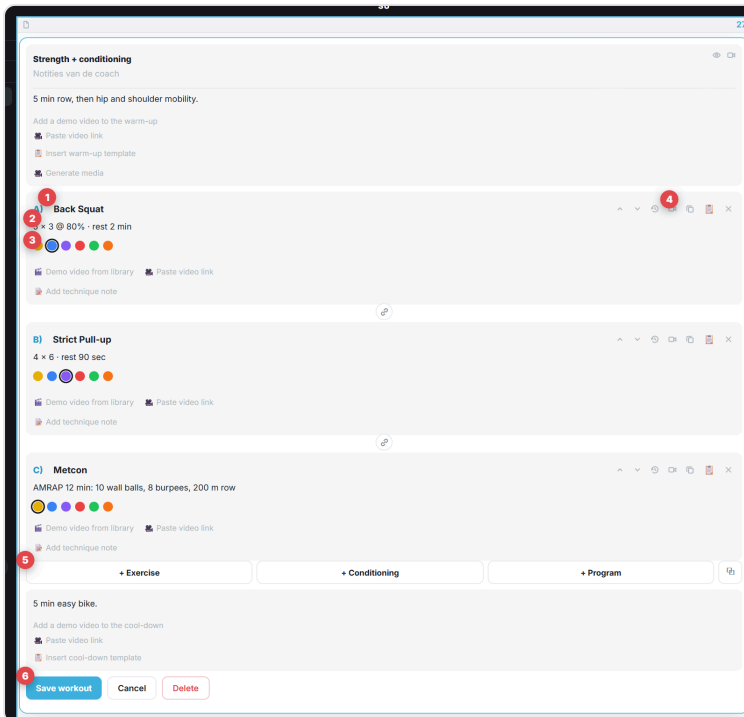

1 browse by month. 2 jump back to today. 3 choose the day, week or month view. 4 switch to another client without going back to the list; if you're an owner, the chip next to it also lets you switch coach. 5 hide the logged scores, handy when you only want to see the programming. 6 export the calendar as a PDF.

3 Filling a day

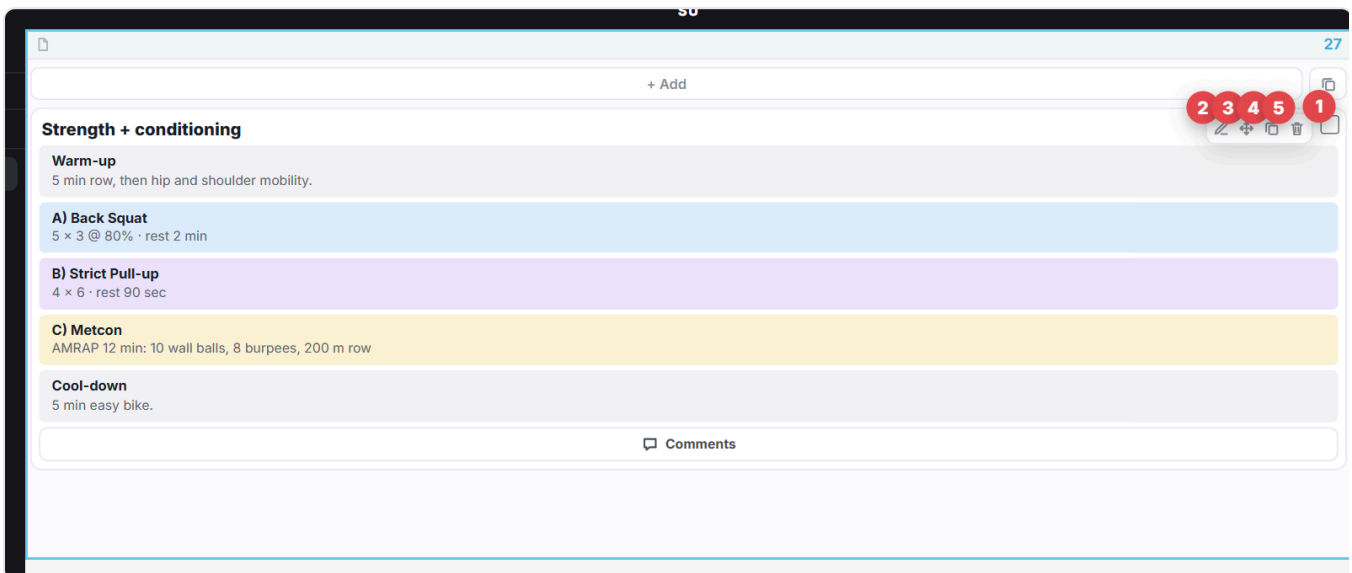

Click an empty day and you get four options. Workout opens the builder so you can create something yourself. Rest day closes the day. Program opens your templates and previous YP Showdowns so you can insert one. Paste puts a workout you copied earlier on this day.

4 The workout builder

1 type the name of the exercise; the library searches along and links the demo video itself. 2 write in plain text what your client needs to do: sets, reps, tempo and rest. 3 choose the block colour (red is weightlifting/primers, blue conditioning, green gymnastics, yellow accessory/special strength, purple workout with leaderboard, orange other). 4 link or swap the demo video. 5 add an exercise, a conditioning block or a whole template. 6 save, and the workout is in your client's app.

5 Copying, dragging and deleting cards

Hover over a card and buttons appear. 1 the tick selects the card; select several and copy or delete them in one go. 2 edit, or enter scores if the day has already passed. 3 drag the workout to another day. 4 copy to another day, keeping the spacing between multiple days. 5 delete.

6 Enter scores yourself

Strength + conditioning
Anne de Vries · 27 September 2026

Enter the scores for this client. Leave blank = not logged yet. Click the red cross to mark a block as missed.

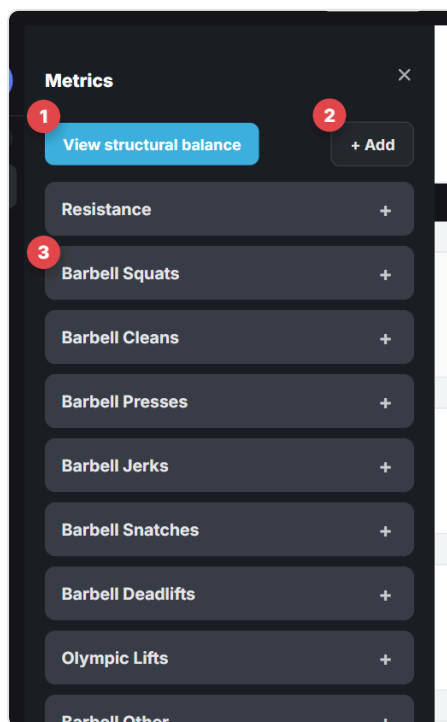

A Back Squat 5 × 3 @ 80% · rest 2 min	Result...	X
B Strict Pull-up 4 × 6 · rest 90 sec	Result...	X
C Metcon AMRAP 12 min: 10 wall balls, 8 burpees, 200 m row	Result...	X

Save scores **Cancel**

1. Enter the score per block
2. Or mark it as missed

For personal training, or if your client forgets to log, enter the scores yourself. Click the pencil on a card for today or a day that has already passed. You get a field per block; leaving it empty means not logged yet. Use the red cross to mark a block as missed.

7 The sidebar panels

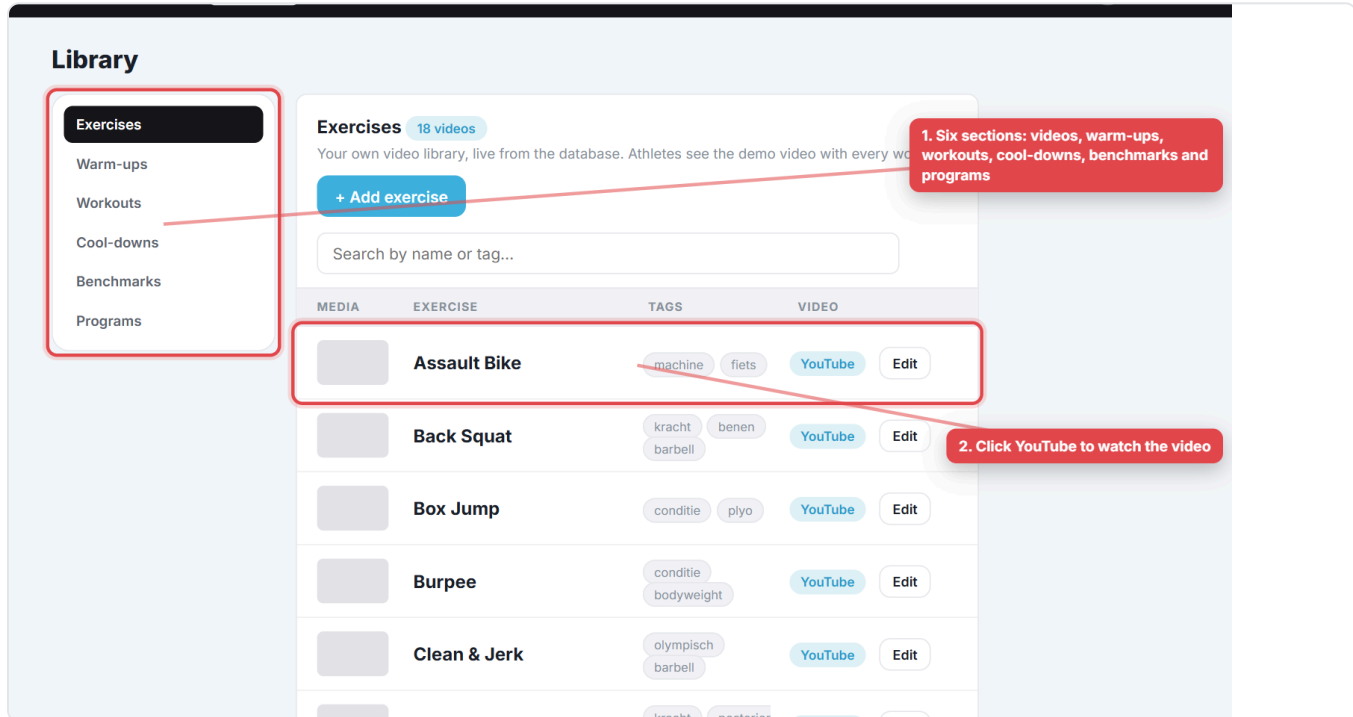

Each heading in the sidebar opens a panel about this client. This is Metrics & 1RM: 1 view the structural balance, 2 add a metric, 3 expand a group to see and update the values per exercise. The other panels work the same way: assessment, goals, planning, notes, training schedule, priorities and equipment. Notes, planning and consultations are for coaches only; your client never sees them.

4. Library & programs

Everything you reuse: exercise videos, go-to warm-ups and workouts, the benchmark catalogue and complete multi-week programs.

1 Exercises with demo video

The video library with over four thousand exercises. Search by name or tag, and click YouTube to watch the video. When you type an exercise in the builder, the app pulls the video from here, so your client can see in the app how the movement should look. Add your own with + Add exercise.

2 Warm-ups, workouts and cool-downs

1. Filter by category, year, format or division

The official descriptions of the well-known workouts: every CrossFit Open workout since 2011, the Quarterfinals, the Girls and the Hero workouts. Filter by category, year, format or division. Handy when you want to repeat a benchmark and get the text exactly right.

4 Multi-week programs

The screenshot shows a web interface titled 'Library' on the left sidebar. The main content area is titled 'Programs' and shows a list of three programs. A red box highlights the '+ Add program' button, with a callout '2. Create a new program'. Another red box highlights the 'Hyrox build-up' program row, with a callout '1. Click a program to build the weeks'.

Library

- Exercises
- Warm-ups
- Workouts
- Cool-downs
- Benchmarks
- Programs**

Programs 3 programs

Use the program index to add frequently used workout sets to your clients.

[+ Add program](#)

Search by name or tag...

PROGRAM	LEVEL	ACTIVE	TYPE	FROM	
Hyrox build-up Combining running, sled and compromised running.	Gemiddeld	0 clients	standaard	MI	Edit ⋮
Strength basics 8 weeks Building squat, deadlift and press for new members.	Beginner	2 clients	standaard	MI	Edit ⋮
Competition prep Six weeks towards the Lowlands Throwdown.	Gevorderd	0 clients	standaard	MI	Edit ⋮

A program is a block of several weeks that you build once and then assign to clients. Click a program to fill in the weeks; each week has seven days and per day you build the workout just like for a client. With Assign program you choose a client and a start date, and the workouts are placed on their calendar. Via Manage assignments you see who's following the program and can roll it back from today onwards. If a program has a padlock, you can view it but not edit it: that program belongs to a colleague. An admin can give you permissions for it.

5. Coaches

Manage your team: who's a coach, what they can edit, and how to properly say goodbye to a coach who's leaving. You only see this page as an owner or admin.

1 The coach list

The screenshot shows a dashboard for managing coaches. At the top, there are four summary cards: '6 TOTAL CLIENTS', '78% COMPLIANCE', '33% CONSULT RATE - 30 DAYS', and '67% TOUCHPOINTS'. Below this is a section titled 'Coaches' with a '+ Add coach' button. A table lists two coaches: Michel Bakker (Owner) and Thirza den Boer (Coach). Annotations highlight key features: '1. Clients and the email address' points to the coach's name and email; '2. Invite a new coach' points to the '+ Add coach' button; and '3. The management menu' points to the dropdown menu for the Coach role, which includes options like 'Make owner', 'Permissions...', 'Trains with...', and 'Archive or delete...'.

NAME	WORKOUT %	CONSULTATION RATE	TOUCHPOINTS	ROLE
MI Michel Bakker 3 clients - michel@voorbeeld.nl	100%	33%	67%	Owner
TH Thirza den Boer 2 clients - thirza@example.com	50%	50%	100%	Coach

Each coach is listed with their email address and number of clients 1 , and the numbers for their clients: workout percentage, consultation rate and touchpoints. Click a row to see that coach's clients. With + Add coach 2 you invite a new coach; they get an email to choose a password and then work in this dashboard. Behind the three dots 3 is the management: change role, permissions, and archive or delete.

2 Permissions: who may edit which program

Permissions of Thirza den Boer
Everyone can view. Editing only what you tick here.

☐ **Admin**
Mag alles: in elk programma werken, rechten uitdelen en iemand anders beheerder maken.

1. Admin may do everything

Programma's die deze coach mag aanpassen
Select all **Turn all off**

☒ YP Hyrox Program

☐ YourProgram 1-on-1 block 3

☐ Beginner on-ramp

2. Tick per program what is allowed

Save **Cancel**

Everyone can view, but only what's ticked here can be edited. The Admin tick 1 gives someone all permissions: work in every program, hand out permissions and make someone else an admin. Below that you tick per program what this coach may edit 2. Whoever creates a program automatically gets permissions for it. A program a coach can't access gets a padlock in the library: view only, no changes. The database really enforces this, so clever workarounds won't work either.

3 Archiving or deleting a coach

The screenshot shows a modal dialog titled "Thirza den Boer archiveren of verwijderen". It contains two buttons: "Archiveren (aanrader)" in blue and "Delete permanently" in grey. Below these is a yellow note box stating: "Note: if you archive this coach they can no longer access the dashboard and won't count anywhere. All their data, workouts and conversations are kept, and you can restore them later with one click." Underneath, it says "This coach still has 1 active client. Ze gaan naar:" followed by a dropdown menu showing "Michel Bakker (eigenaar)". Below the dropdown is a text input field containing the word "archiveren". At the bottom are "Confirm" and "Cancel" buttons. Red annotations include: a box around the dropdown with the text "1. Their clients go to another coach first"; a box around the text input with the text "2. Type the word yourself, only then does the button work"; and a line pointing from the "Confirm" button to the text "To confirm, type the word archiveren".

Thirza den Boer archiveren of verwijderen

Archiveren (aanrader) Delete permanently

Note: if you archive this coach they can no longer access the dashboard and won't count anywhere. All their data, workouts and conversations are kept, and you can restore them later with one click.

This coach still has 1 active client. Ze gaan naar:

Michel Bakker (eigenaar) ▼

To confirm, type the word archiveren

archiveren

Confirm Cancel

1. Their clients go to another coach first

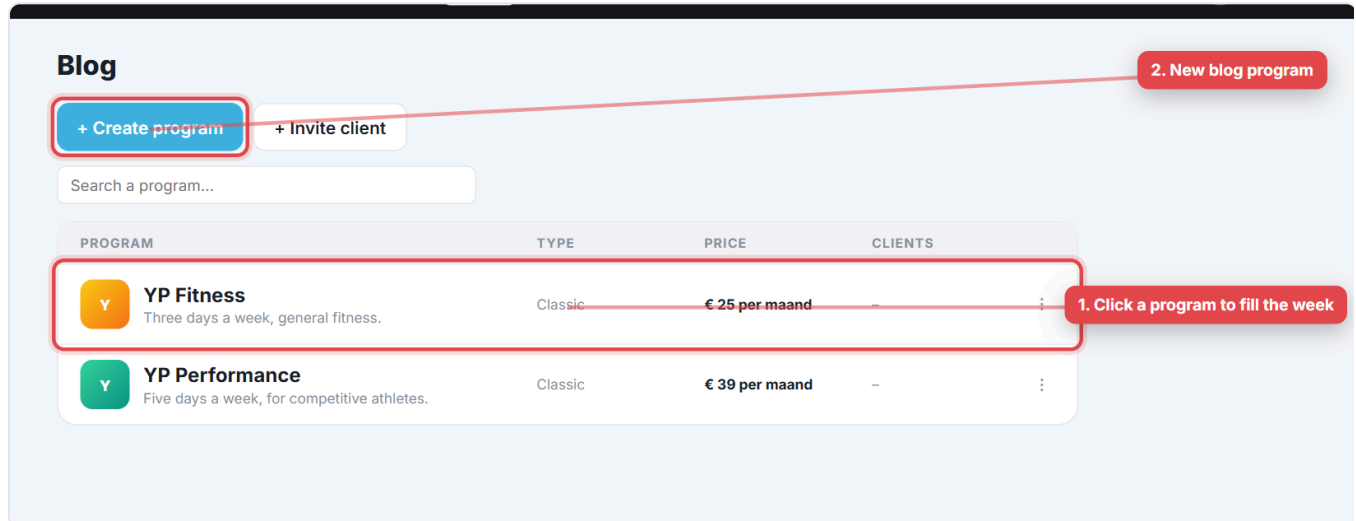

2. Type the word yourself, only then does the button work

If a coach leaves, choose Archive or delete behind the three dots. If they still have clients, you first choose which coach those go to 1 ; their programmed workouts move along too, so nothing is left hanging. To confirm, you type the word archive or delete yourself 2 , so it never happens by accident. Archiving is the recommended option: everything is kept, the coach just can't log in anymore, and you can bring them back with one click via the archive block at the bottom. Deleting is permanent.

6. Blog

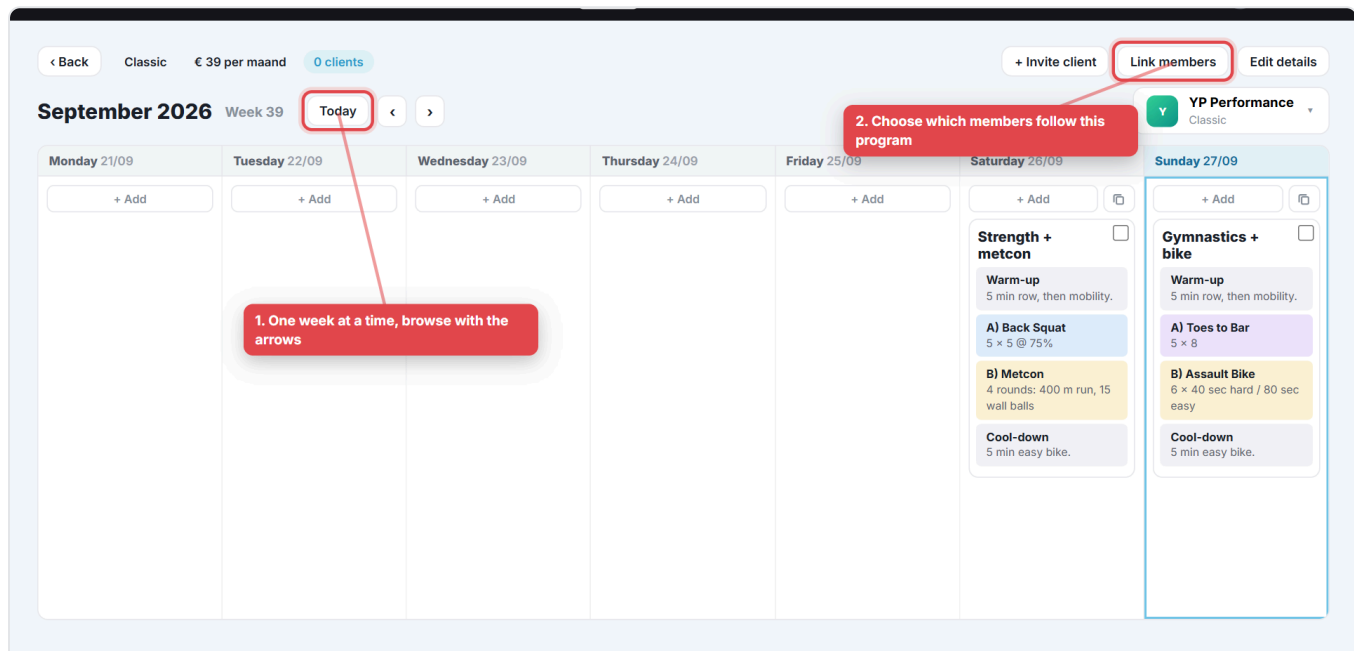

Blog programs are ongoing programs for your online members. They follow one and see the workout in their app every day.

1 Your blog programs

Each program has a name, a short description, a type and a price that is display-only (payments still happen outside the app). The Clients column counts how many members follow it. Click a program to fill the week. With + Invite client you set up a free blog member here; if a program is open, they follow that program straight away.

2 Filling the week

You see one week from Monday to Sunday, with wide columns so the whole workout is readable. Browse with the arrows or jump back with Today. Click + Add in a day and you get the same day menu as with a client. With Link members you choose who follows this program; a member follows one at a time.

7. YP Showdown & leaderboard

The YP Showdown is the one workout everyone does: your paying clients and the free blog members. That comes with a shared leaderboard.

1 The YP Showdowns

The screenshot shows the 'YP Showdown' section of a web application. At the top, there is a '+ New YP Showdown' button. Below it is a search bar with the placeholder text 'Search by name or date (e.g. 15 July)...'. A list of YP Showdowns is displayed, with the first one being 'YP Showdown week 30'. This card includes details: 'free for everyone', '4 participants', and 'published 26 September 2026'. To the right of the card are buttons for 'Edit' and 'Delete', and a 'Copy share link' button. A 'Hide leaderboard' button is also present. Below the card, the section is titled 'Other / Rx' and shows a leaderboard with one entry: 'Joris Bakker' with a score of '7 rounds + 2 · 1-on-1 client'. Callouts with numbers 1, 2, and 3 point to the '+ New YP Showdown' button, the 'YP Showdown week 30' card, and the 'Copy share link' button respectively.

YP Showdown

+ New YP Showdown

Search by name or date (e.g. 15 July)...

YP Showdown week 30

free for everyone 4 participants published 26 September 2026

Hide leaderboard

Other / Rx

1 JO Joris Bakker RX 7 rounds + 2 · 1-on-1 client 4 0

1. Post this week's YP Showdown

2. Every YP Showdown is a card, newest on top

3. Share the link with your members

Each YP Showdown is listed as a card, newest at the top. With + New YP Showdown you create one: name, the workout text with Rx and scaled, and the score type (time, rounds plus reps, reps, load or free text). It goes live immediately. Use the share link to send it to your members.

2 Reading the leaderboard

The screenshot shows the 'Other / Rx' section of the leaderboard. It lists three entries: 'Joris Bakker' (1st place, 7 rounds + 2 · 1-on-1 client), 'Anne de Vries' (2nd place, 6 rounds + 8 · 1-on-1 client · "Heavier than expected"), and 'Tom Verhoeven' (3rd place, 6 rounds + 1 · blog member). Each entry has a bump icon (3) and a comments icon (4). Below this, the section is titled 'Other / Scaled' and shows one entry: 'Fleur Jansen' (1st place, 5 rounds + 14 · 1-on-1 client). Callouts with numbers 1, 2, 3, and 4 point to the 'Other / Rx' header, the first entry row, the bump icon, and the comments icon respectively.

Other / Rx

1 JO Joris Bakker RX 7 rounds + 2 · 1-on-1 client 3 4

2 AN Anne de Vries RX 6 rounds + 8 · 1-on-1 client · "Heavier than expected" 2 1

3 TO Tom Verhoeven RX 6 rounds + 1 · blog member 1 0

Other / Scaled

1 FL Fleur Jansen SC 5 rounds + 14 · 1-on-1 client 3 2

1. Split by men, women, Rx and scaled

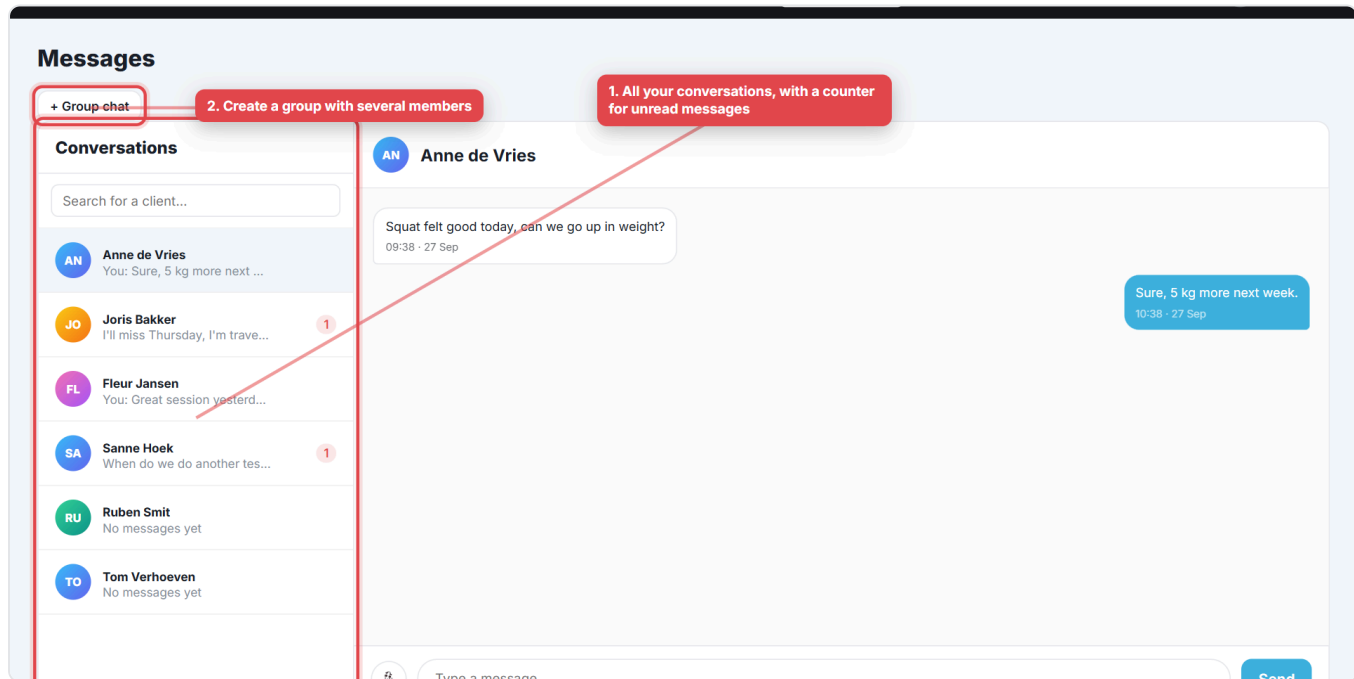

2. Name, score and whether someone is a 1-on-1 client or blog member

Scores are split by men, women and Rx or scaled, and sorted by the score type you chose. Each row shows the name, the score and whether someone is a 1-on-1 client or blog member. 3 is the first bump ('well done'), 4 is the comments. Only scores a member sets to public appear here; private scores are visible only to their own coach.

8. Messages & group chats

One ongoing conversation per client, plus groups when you want to reach several people at once.

1 Conversations and groups

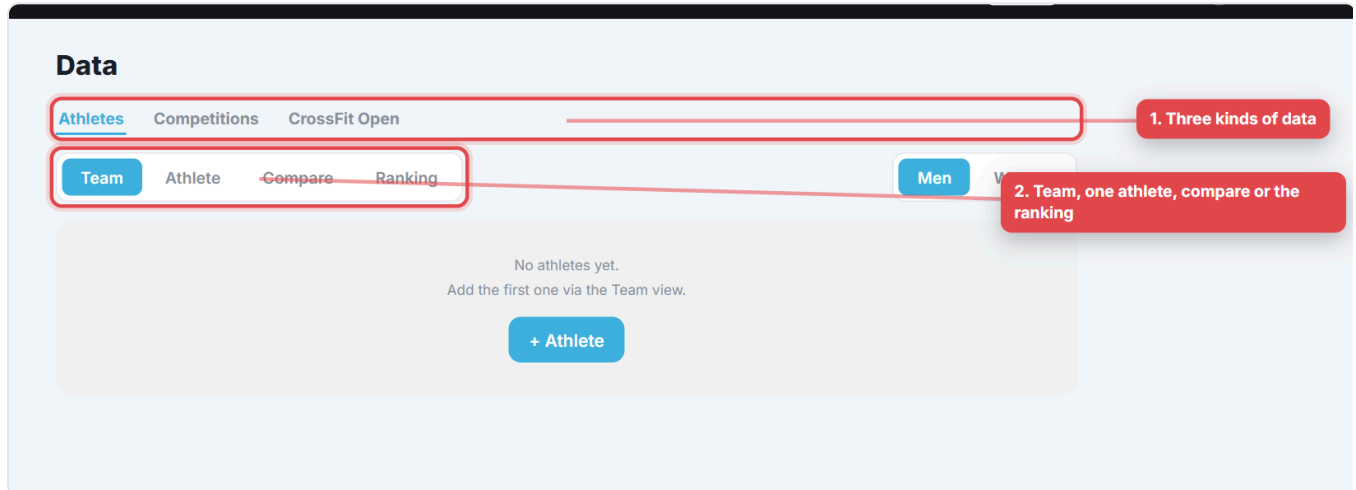

On the left, all your conversations with the last line underneath and a counter for unread messages; clients without messages are at the bottom. Click a name and the conversation opens on the right, with the input field at the bottom (enter sends). New messages come in live. With + Group chat you create a group with several members, for example for a competition team. As a coach you see your own clients; if you're an owner, you see all conversations and can filter by coach.

9. Data

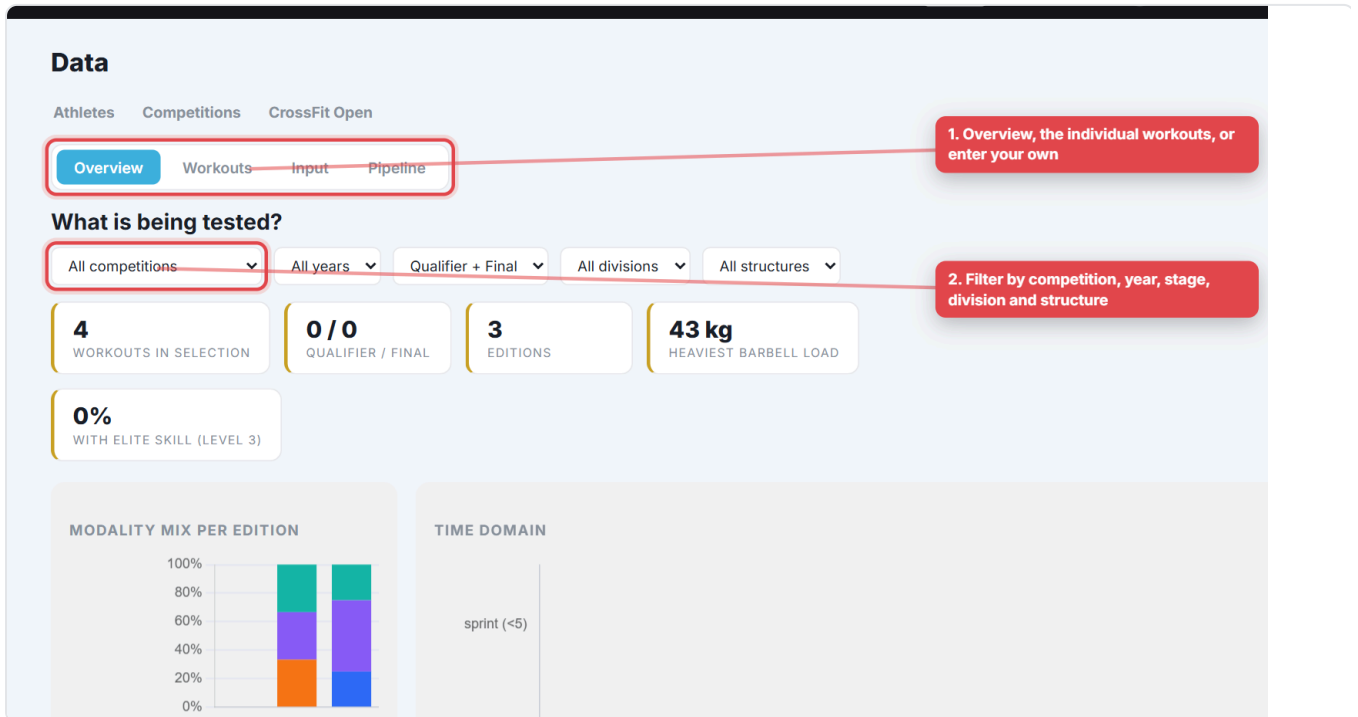

Numbers to program with: your athletes' strength values, what competitions demand, and the scores from the CrossFit Open.

1 Athletes

This is where you track your athletes' test results: lifts, benchmarks and body weight. Use the buttons to pick the whole team, one athlete, a comparison between athletes or the ranking. An athlete you link to a client automatically pulls their 1RMs from their client file.

2 Competitions

Almost a thousand workouts from the Benelux competitions, from Amsterdam Throwdown to Marbella. At the top you switch between the overview, the individual workouts and entering your own. Use the filters to choose competition, year, qualifier or final, division and structure. The overview shows what actually gets tested: which movements, which time domains and how heavy. That way you know what to program for an athlete who's competing.

2	Milan de Jong	CrossFit Capelle	301 reps
3	Thijs Vermeer	CrossFit Capelle	292 reps
4	Bram Coenen	CrossFit Capelle	283 reps
5	Sander Nauta	CrossFit Capelle	274 reps

▼ Open 25.2

 for time · Time cap 12 min · Rx pull-ups, 34 kg dumbbell [Hide workout](#)

The full description of every Open workout since 2011, with the world's top ten scores alongside. Pick the year and men or women. The Analysis button works out across all years which movements and formats come back most often.

10. Settings

Your own profile, your password, your branding and which notifications you want. Open it via your avatar at the top right.

1 Your profile

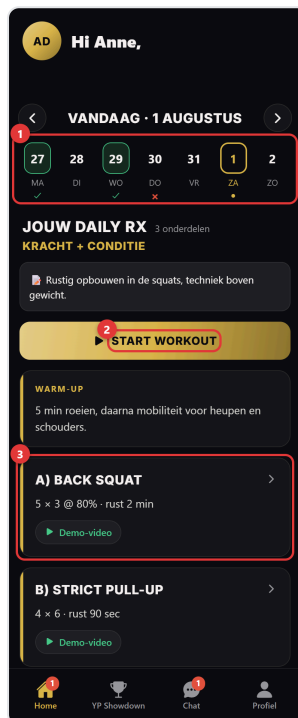

The screenshot shows the 'Settings' page with a sidebar on the left containing six options: Profile, Password, Theme, Consultation link, Notifications, and Partners. The 'Profile' option is highlighted with a red box and labeled '1. Six pages of settings'. The main content area shows a 'Profile progress' bar at 75%, a profile card for 'Michel Bakker' with a photo placeholder and a pencil icon (labeled '2. Put your profile photo here'), and form fields for 'First name' (Michel), 'Last name' (Bakker), 'About you' (Coach at CrossFit Capelle), 'Email address' (michel@voorbeeld.nl), 'Company name' (CrossFit Capelle), and 'Company logo' (Upload logo, Max 5 MB). A 'Save profile' button is at the bottom left, labeled '3. Don't forget to save'.

1 on the left are six pages: profile, password, theme, consultation link, notifications and partners. 2 use the little pencil on your photo to upload a profile photo; your clients see it in the app and in the chat. Fill in About you as well, it feels familiar. If you're an owner, this is also where you change the company name and logo. 3 don't forget to save. Under Theme you choose the brand colour, under Notifications you set per type whether you want an in-app notification and an email.

11. The athlete app

Your client doesn't use this dashboard but the YourProgram app on their phone. At the bottom of that app are four tabs: Home, YP Showdown, Chat and Profile. Everything they log there comes straight through to you. It's good to know what they see, so you can talk them through it.

1 Home: your client's day

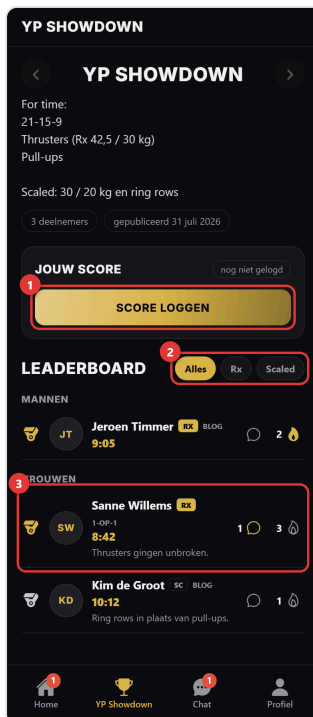

1 the week strip: a dot on a day with a program, a tick on a completed day, a cross on a missed day and a ring around today. Your client taps a day to look back or ahead, and swipes across the strip to move a week back or forward. 2 with Start workout they start logging. 3 each block is shown as a card with the full text you programmed; if you've linked a demo video, it's right there too. Your note for the workout sits at the top in the grey memo. If they scroll all the way down, they'll find Comments there: the conversation about this specific workout, separate from the regular chat.

2 How your client logs their score

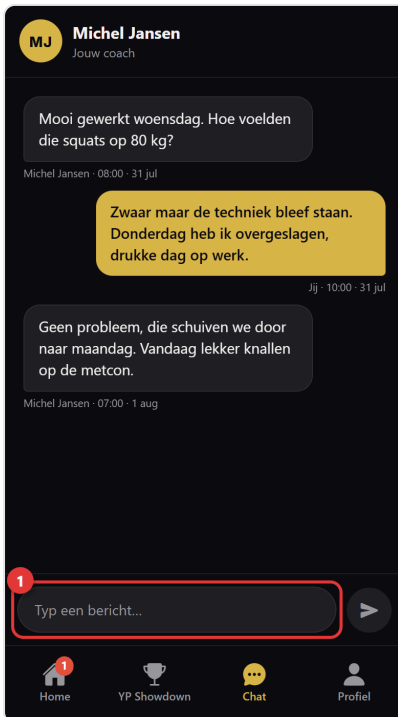

After Start workout they go through the day block by block, with the counter at the top (here 2 of 5). 1 the input field is already set up correctly: here the app asks for a weight, for a metcon it asks for rounds or a time. 2 with + Note they write down how it went. 3 Save sets the block to completed. 4 didn't do it? Then Missed, so you see it instead of the day staying empty. Above the field you'll also find Demo video, History (what did I do last time) and % for a percentage of their 1RM.

3 The YP Showdown and the leaderboard

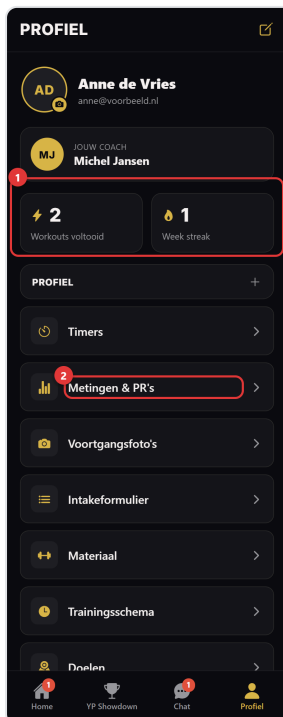

Only the YP Showdown has a leaderboard; regular workouts stay private between you and your client. 1 here they log their score, choose Rx or scaled, and decide themselves whether the score can be public. Private means: only you and they can see it. 2 everyone can filter on Rx or scaled. 3 per score you see the name, whether someone is a 1-on-1 client or blog follower, the note, and the thumbs-ups and comments from others.

4 Chat with you

1 this is exactly the same chat as Messages in your dashboard: whatever you type there arrives here. Your name and profile photo sit above the conversation, so set those up properly in Settings. Your client can see straight away who's replying to them.

5 Profile and their own details

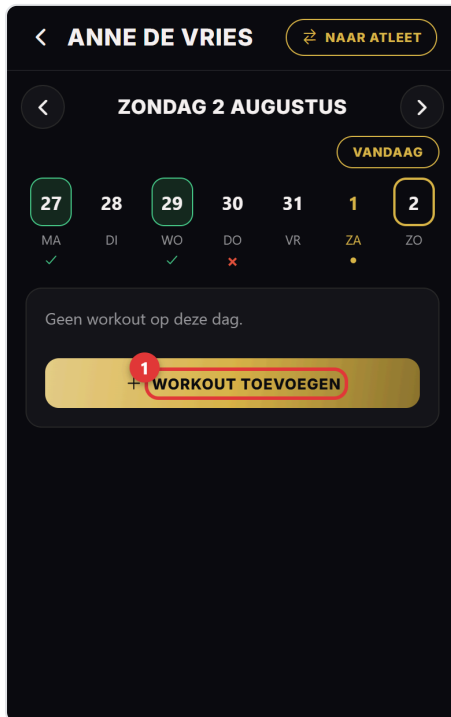

1 are counters: completed workouts and the streak in weeks. 2 under Metrics and PRs they see the same numbers you see in the side panel of the client screen; they can add a metric themselves. Below that are Timers, Progress photos, the intake form, equipment, training schedule and goals: all the same data you see too. Further down they can turn on receiving their workout by email every morning, and make the text bigger across the whole app, handy for anyone who finds the screen small.

6 See it yourself on your phone

If you're a coach yourself, you'll find the Switch to coach button under Profile. 1 you see your athletes with what's still open today for each of them; green means everything is logged. Whoever needs attention is at the top, and above six athletes a search field appears. Tap an athlete and you land in their week, where you can enter scores (handy for personal training) and adjust workouts. 2 with To athlete you go back to your own program.

7 Adding a workout in the app

On an empty day for your athlete you'll find 1 the Add workout button: title, warm-up, blocks and cool-down, done while you're standing next to them. If you type an exercise that's in the video library under exactly that name (for example Back Squat), the app links the demo video automatically. For these blocks the input field for your athlete is a free text field; if you want a real score type (time, kilos, rounds), supersets or percentages, build the workout in the dashboard on the computer.
